SKILLS

- Swift | Dart | Flutter | Python3 | JavaScript | Java | C | Flask | Git | MySQL | PostgreSQL | REST API
- iOS & Android App Development | OOP | Supabase | NodeJS | CI/CD Pipeline | Agile Methodology

WORK EXPERIENCE

Grab: *intern, Software Engineer Mobile (iOS) - ACE* *Petaling Jaya, Selangor* **July 2024 - December 2024**

- Led the migration of ETA displays for iOS cross-regional order in the GrabFood app, enhancing the user experience for **20+** million registered users.
- Led the end-to-end migration of in-house localization workflows for the GrabFood application, developing reusable **Python**-based processes for content scanning, review, and prioritization—resulting in improved translation accuracy across nine languages.
- Managed a complex payment experience bug on the basket page for the Philippines region by optimizing default payment method behavior, eliminating unnecessary user steps and streamlining checkout flow for **500,000+** monthly active users.

Ingenious Lab: *intern, Mobile Developer (Flutter)* *Bangsar South, Kuala Lumpur* **May 2022 - August 2022**

- Developed and maintained a reusable component library in **Flutter** and **DBeaver**, accelerating B2B client application development and enhancing user experiences.
- Delivered **20+** dynamic components, streamlining the team's development workflow and boosting efficiency.
- Collaborated with designers, product managers, and project managers to ensure on-time project delivery, utilizing **Jira** for task management and **GitLab** for version control.

Nickies: *Product Manager* *Kota Bharu, Kelantan* **February 2024 - Present**

- Run a coffeehouse business with an average of over **25,000** sales per fiscal quarter throughout the year.
- Developed a streamlined system for organizing and managing inventories, improving accuracy by **90%** and ensuring quick and easy access to items.
- Conducted user research and gathered feedback from staff and customers to iterate on features, ensuring seamless customer experiences and operational efficiency.

PROJECT

Nickies POS & KDS System, Mobile Application [Visit Profile](#) | [Visit Docs](#)

- Developed a point-of-sales system, to manage operations and simplify for F&B businesses using **SwiftUI** and **Supabase**, enabling rapid iteration cycles with a scalable backend.
- Designed a centralized hub to synchroize orders, inventory, and sales data across multiple devices, providing real-time insights for better decisions.

Evercook, Mobile Application [Visit Docs](#)

- Developed entire iOS app with **Flutter** and **Supabase** to create a delightful user experience to effortlessly manage, collect, and shares recipes.
- Implemented **Clean Architecture** and **BLoC** state management to develop maintainable and well-structured applications.

Arachna, Web Scrapper Tools

- Developed a **Python API** and **BeautifulSoup** to extract and analyze metadata from over **20+** top rated websites, focusing on recipe data content and significantly reducing manual data entry.
- Designed and implemented a **RESTful API** delivering structured **JSON** responses, enabling seamless data consumption by the front-end team for dynamic content display.

EDUCATION

Multimedia University || Cyberjaya, Selangor

October 2022 - December 2024

B.S. Computer Science, Hons. Software Engineer || CGPA: 3.64 (Second Upper Class)

Relevant Coursework: Software Engineering Fundamentals, Data Structures and Algorithms, Operating Systems, Mobile App Development, Object-Oriented Programming, Advanced Databases
